Name

CAD Set 3 Part 2

Class

Total questions: 33

Worksheet time: 17mins

Date

1. Modules must have a Link type. Which one of the following is a list of Link types?

a) List of Records, Separator, Catalog Type, Roles

b) Assessment, List of Records, Separator, Timeline Page

c) List of Records, Content Page, Order, URL (from arguments:)

d) Assessment, List of Records, Content Page, Roles

2. Which one of the following is part of the client-side scripting API?

a) workflow.scratchpad

b) GlideUser object (g_user)

c) current and previous objects

d) GlideSystem object (gs)

3. Which objects can you use in a Scheduled Script Execution (Scheduled Job) script?

a) GlideRecord and current

b) GlideUser and GlideRecord

c) GlideSystem and GlideRecord

d) GlideSystem and current

4. Which one of the following is true for GlideUser (g_user) methods?

a) Can be used in Client Scripts and UI Policies only

b) Can be used in Business Rules only

c) Can be used in Client Scripts, UI Policies, and UI Actions

d) Can be used in Business Rules, and Scripts Includes

5. Which of the following statements is not for the Form Designer?

a) To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form.

b) To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field.

c) To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button.

d) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.

6. Which one of the following methods prints a message on a blue background to the top of the current form by default?

a) g_form.addInfoMsg()

b) g_form.addInfoMessage()

c) g_form.showFieldMessage()

d) g_form.showFieldMsg()

7. There is a basic strategy when creating a Utils Script Include. Identify the step that does not belong.

a) Identify the table

b) Script the function(s)

c) Create a class

d) Create a prototype object from the new class

8. In a Business Rule, which one of the following returns true if the currently logged in user has the admin role?

a) g_form.hasRoleExactly('admin')
b) gs.hasRole('admin')
c) g_form.hasRole('admin')
d) gs.hasRoleExactly('admin')

9. When a ServiceNow instance requests information from a web service, ServiceNow is the web service:

a) Publisher
b) Specialist
c) Provider
d) Consumer

10. Which of the following objects does a Display Business Rule NOT have access to?

a) previous
b) GlideSystem
c) g_scratchpad
d) current

11. Which one of the following is NOT a method used for logging messages in a server-side script for a privately-scoped application?

a) gs.log()
b) gs.error()
c) gs.warn()
d) gs.debug()

12. What syntax is used in a Record Producer script to access values from Record Producer form fields?

a) producer.field_name
b) producer.variablename
c) current.variable_name
d) current.field_name

13. Which one of the following is true for a Script Include with a Protection Policy value of Protected?

a) Any user with the protected_edit role can see and edit the Script Include
b) The Protection policy option can only be enabled by a user with the admin role
c) The Protection Policy is applied only if the glide.app.apply_protection system property value is true
d) The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store

14. Which one of the following is true regarding Application Scope?

a) All applications are automatically part of the Global scope
b) Applications downloaded from 3rd party ServiceNow application developers cannot have naming conflicts
c) Any developer can edit any application
d) Developers can choose the prefix for a scope's namespace

15. Which objects can be used in Inbound Action scripts?

a) current and previous
b) current and email
c) current and event
d) current and producer

16. Which Application Access configuration field(s) are NOT available if the Can read configuration field is NOT selected?

a) All access to this table via web services
b) Can create, Can update, and Can delete
c) Can read does not affect the availability of other Application Access fields
d) Allow configuration

17. Which one of the following client-side scripts apply to Record Producers?

a) Catalog Client Scripts and Catalog UI Policies
b) UI Scripts and UI Actions
c) UI Scripts and Record Producer Scripts
d) Client Scripts and UI Policies

18. From the list below, identify one reason an application might NOT be a good fit with ServiceNow. The application:

a) Needs workflow to manage processes
b) Requires 'as-is' use of low-level programming libraries
c) Requires reporting capabilities
d) Uses forms extensively to interact with data

19. Which one of the following is NOT a UI Action type?

a) List choice
b) Form button
c) List banner button
d) Form choice

20. Which one of the following is NOT a purpose of application scoping?

a) Provide a relationship between application artifacts
b) Provide a way of tracking the user who developed an application
c) Provide a namespace (prefix and scope name) to prevent cross application name collisions
d) Provide controls for how scripts from another scope can alter tables in a scoped application

21. Which one of the following is true for a table with the 'Allow configuration' Application Access option selected?

a) Only the in scope application's scripts can create Business Rules for the table
b) Any user with the application's user role can modify the application's scripts
c) Out of scope applications can create Business Rules for the table
d) Out of scope applications can add new tables to the scoped application

22. When configuring the content of an Email Notification, which syntax should be used to reference the properties of an event triggering the Notification? (Check It Once)

a) ${event.}
b) ${current.}
c) ${property name>.getDisplayValue()}
d) ${gs.}

23. A scoped application containing Flow Designer content dedicated to a particular application is called a(n):

a) Spoke
b) Bundle
c) Action Way
d) Flow

24. The source control operation used to store local changes on an instance for later application is called a(n).

a) Branch
b) Tag
c) Stash
d) Update set

25. Which one of the following is NOT required to link a ServiceNow application to a Git repository?

a) Password
b) URL
c) User name
d) Application name

26. When configuring a REST Message, the Endpoint is:

a) The commands to the REST script to stop execution
b) The URI of the data to be accessed, queried, or modified
c) Information about the format of the returned data
d) The response from the provider indicating there is no data to send back

27. Which roles grant access to source control repository operations such as importing applications from source control, or linking an application to source control? (Choose two.)

a) source_control
b) source_control_admin
c) admin
d) git_admin

28. Which one of the following is NOT a debugging strategy for client-side scripts?

a) g_form.addInfoMessage()
b) Field Watcher
c) jslog()
d) gs.log()

29. If the Create module field is selected when creating a table, what is the new module's default behavior?

a) Open an empty form so new records can be created
b) Open a link to a wiki article with instructions on how to customize the behavior of the new module
c) Display an empty homepage for the application
d) Display a list of all records from the table

30. which of the following is not a way to install an application on SNOW instance?

a) select the copy button on the application record
b) download and install a 3rd party application from the SNOW store.
c) Download and install an application from SNOW share web site
d) Install an application from application repository.

31. true about application picker and application scope?

a) select a global in application picker sets the application scope to incident
b) select an application from the application picker sets the application scope

32. which of the following is not a caller access field option?

a) Caller tracking
b) caller restrictions
c) Caller permission
d) None

33. Which of the following is true about deleting field from table?

a) user defined non inherited field can be deleted.
b) any field on the table can be deleted
c) table record is deleted when a field is deleted
d) inherited field can be deleted

Answer Keys

1. b) Assessment, List of Records, Separator, Timeline Page
2. b) GlideUser object (g_user)
3. c) GlideSystem and GlideRecord
4. c) Can be used in Client Scripts, UI Policies, and UI Actions
5. d) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.
6. b) g_form.addInfoMessage()
7. a) Identify the table
8. b) gs.hasRole('admin')
9. d) Consumer
10. a) previous
11. a) gs.log()
12. b) producer.variablename
13. d) The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store
14. b) Applications downloaded from 3rd party ServiceNow application developers cannot have naming conflicts
15. b) current and email
16. b) Can create, Can update, and Can delete
17. a) Catalog Client Scripts and Catalog UI Policies
18. b) Requires 'as-is' use of low-level programming libraries
19. d) Form choice
20. b) Provide a way of tracking the user who developed an application
21. c) Out of scope applications can create Business Rules for the table
22. a) ${event.}
23. a) Spoke
24. c) Stash
25. d) Application name
26. b) The URI of the data to be accessed, queried, or modified
27. a) source_control , c) admin
28. d) gs.log()
29. d) Display a list of all records from the table
30. a) select the copy button on the application record
31. b) select an application from the application picker sets the application scope
32. c) Caller permission
33. a) user defined non inherited field can be deleted.
