CAD Set 3 part 1

Class

Total questions: 30

Worksheet time: 15mins

Date

1. Which one of the following is the fastest way to create and configure a Record Producer?

a) Create a Catalog Category, open the category, and select the Add New Record Producer button

b) Use the Record Producer module then add and configure all variables manually

c) Open the table in the Table records and select the Add to Service Catalog Related Link

d) Open the table's form, right-click on the form header, and select the Create Record Producer menu item

2. Which one of the following is the baseline behavior of a table in a privately-scoped application?

a) The table and its data are not accessible using web services

b) Any Business Rule can read, write, delete, and update from the table

c) Only artifacts in the table's application can read from the table

d) All application scopes can read from the table

3. When configuring a module, what does the Override application menu roles configuration option do?

a) Users with the module role but without access to the application menu access the module

b) Self-Service users can access the module even though they do not have roles

c) Admin is given access to the module even if Access Controls would ordinarily prevent access

d) Users with access to the application menu can see the module even if they don't have the module role

4. Which of the following features are available to Global applications? (Choose two.)

a) Automated Test Framework

b) Source Control

c) Delegated Development

d) Flow Designer

5. What is a Module?

a) The functionality within an application menu such as opening a page in the content frame or a separate tab or window

b) A group of menus, or pages, providing related information and functionality to end-users

c) A way of helping users quickly access information and services by filtering the items in the Application Navigator

d) A web-based way of providing software to end-users

6. Identify the incorrect statement about Delegated Development in ServiceNow.

a) Administrators can grant non-admin users the ability to develop global applications

b) Administrators can specify which application file types the developer can access.

c) Administrators can grant the developer access to script fields.

d) Administrators can grant the developer access to security records.

7. Here is the Business Rule script template: This type of JavaScript function is known as:

a) Constructor
b) Scoped
c) Anonymous
d) Self-invoking

8. What are some of the benefits of extending an existing table such as the Task table when creating a new application?

a) You can repurpose existing fields by simply changing the label.
b) Use existing fields with no modifications.
c) Existing logic from the parent table will be automatically applied to the new table.
d) All of the parent table records are copied to the new table.

9. Which method call returns true only if the currently logged in user has the catalog_admin role and in no other case?

a) g_user.hasRole('catalog_admin')
b) g_user.hasRoleExactly('catalog_admin')
c) g_user.hasRoleOnly('catalog_admin')
d) g_user.hasRoleFromList('catalog_admin')

10. How must Application Access be configured to prevent all other private application scopes from creating configuration records on an application's data tables?

a) You must create Access Controls to prevent all other application scopes from creating configuration records on an application's data tables rather than using Application Access
b) Set the Accessible from field value to All application scopes and de-select the Can create option
c) Set the Accessible from field value to This application scope only and de-select the Allow access to this table via web services option
d) Set the Accessible from field value to This application scope only

11. It is best practice to define the business requirements and the process(es) an application will manage as part of the application development plan. What are some of the considerations to document as part of the business process?

a) Business problem, data input/output, users/stakeholders, and process steps
b) Business problem, data input/output, project schedule, and process steps
c) Business problem, data input/output, users/stakeholders, and database capacity
d) Business problem, users/stakeholders, available licenses, and database capacity

12. To see what scripts, reports, and other application artifacts will be in a published application:

a) Enter the name of the Application in the Global search field
b) Open the list of Update Sets for the instance
c) Examine the Application Files Related List in the application to be published
d) Open the artifact records individually to verify the value in the Application field

13. Application developers configure ServiceNow using industry standard JavaScript to...

a) Enable the right-click to edit the context menus on applications in the navigator
b) Extend and add functionality
c) Customize the organization's company logo and banner text
d) Configure the outgoing email display name

14. Which of the following are configured in an Email Notification?

a) Who will receive the notification.
b) What content will be in the notification.
c) When to send the notification.
d) How to send the notification.

15. Which of the following CANNOT be debugged using the Field Watcher?

a) Business Rules
b) Script Includes
c) Client Scripts
d) Access Controls

16. Which of the following is NOT supported by Flow Designer?

a) Call a subflow from a flow
b) Test a flow with rollback
c) Use Delegated Developer
d) Run a flow from a MetricBase Trigger

17. Which of the following statements does NOT apply when extending an existing table?

a) The parent table's Access Controls are evaluated when determining access to the new table's records and fields
b) The new table inherits the functionality built into the parent table
c) The new table inherits all of the fields from the parent table
d) You must script and configure all required behaviors

18. Which of the following are true for reports in ServiceNow? (Choose three.)

a) Any user can see any report shared with them.
b) Can be a graphical representation of data.
c) All users can generate reports on any table.
d) Can be run on demand by authorized users.
e) Can be scheduled to be run and distributed by email.

19. Which of the following is NOT a trigger type in Flow Designer?

a) Outbound Email
b) Application
c) Record
d) Schedule

20. One of the uses of the ServiceNow REST API Explorer is:

a) Practice using REST to interact with public data providers
b) Find resources on the web for learning about REST
c) Convert SOAP Message functions to REST methods
d) Create sample code for sending REST requests to ServiceNow

21. Which platform feature can be used to determine the relationships between field in an Import Set table to field in an existing ServiceNow table?

a) Business Service Management Map
b) Data Sources
c) Transform Map
d) CI Relationship Builder

22. When configuring an Access Control which has no condition or script, which one of the following statements is NOT true?

a) table.* will grant access to every field in a record
b) table.None will grant access to every record on the table
c) table.field will grant access to a specific field in a record
d) table.id will grant access to a specific record on the table

23. Which source control operation is available from BOTH Studio and the Git Repository?

a) Create Branch
b) Apply Remote Changes
c) Stash Local Changes
d) Edit Repository Configurations

24. When creating new application files in a scoped application, cross scope access is turned on by default in which of the following?

a) REST messages
b) Table
c) Script Include
d) Workflow

25. Which one of the following is true?

a) A UI Policy's Actions execute before the UI Policy's Scripts
b) The execution order for a UI Policy's Scripts and Actions is determined at runtime
c) A UI Policy's Scripts execute before the UI Policy's Actions
d) A UI Policy's Actions and Scripts execute at the same time

26. When evaluating Access Controls, ServiceNow searches and evaluates:

a) Only for matches on the current table
b) Only for matches on the current field
c) From the most specific match to the most generic match
d) From the most generic match to the most specific match

27. Which Report Type(s) can be created by right-clicking on a column header in a table's list?

a) Bar Chart, Pie Chart, Histogram, and Line
b) Bar Chart
c) Bar Chart, Pie Chart, and Histogram
d) Bar Chart and Pie Chart

28. When working in the Form Designer, configuring the label of a field in a child table changes the label on which table(s)?

a) base table
b) child table
c) parent table
d) all tables

29. In an Email Notification, which one of the following is NOT true for the Weight field?

a) Only Notifications with the highest weight for the same record and recipients are sent
b) A Weight value of zero means that no email should be sent
c) The Weight value defaults to zero
d) A Weight value of zero means the Notification is always sent when the Notification's When to send criteria is met

30. Which of the following methods are useful in Access Control scripts?

a) g_user.hasRole() and current.isNewRecord()
b) gs.hasRole() and current.isNewRecord()
c) g_user.hasRole() and current.isNew()
d) gs.hasRole() and current.isNew()

Answer Keys

1. c) Open the table in the Table records and select the Add to Service Catalog Related Link
2. d) All application scopes can read from the table
3. a) Users with the module role but without access to the application menu access the module
4. a) Automated Test Framework, d) Flow Designer
5. a) The functionality within an application menu such as opening a page in the content frame or a separate tab or window
6. a) Administrators can grant non-admin users the ability to develop global applications
7. d) Self-invoking
8. a) You can repurpose existing fields by simply changing the label., b) Use existing fields with no modifications., c) Existing logic from the parent table will be automatically applied to the new table.
9. g) cg_user.hasRoleExactly('catalog_admin')
10. d) Set the Accessible from field value to This application scope only
11. a) Business problem, data input/output, users/stakeholders, and process steps
12. c) Examine the Application Files Related List in the application to be published
13. b) Extend and add functionality
14. a) Who will receive the notification., b) What content will be in the notification., c) When to send the notification.
15. b) Script Includes
16. b) Test a flow with rollback
17. d) You must script and configure all required behaviors
18. b) Can be a graphical representation of data., d) Can be run on demand by authorized users., e) Can be scheduled to be run and distributed by email.
19. a) Outbound Email
20. d) Create sample code for sending REST requests to ServiceNow
21. c) Transform Map
22. d) table.id will grant access to a specific record on the table
23. a) Create Branch
24. b) Table
25. a) A UI Policy's Actions execute before the UI Policy's Scripts
26. c) From the most specific match to the most generic match
27. d) Bar Chart and Pie Chart
28. b) child table
29. b) A Weight value of zero means that no email should be sent
30. b) gs.hasRole() and current.isNewRecord()
